July 31, 2018 PDF | Introduction: The XN-550 is a new compact automated hematology of the XN-550, using the XN-20 (which has a similar operating system) as a reference analyser. Correlation analysis graphs between the platelet count as measured by the SysMex XE-2100 Hematology Self-Analyser (Sysmex, Kobe, JapA) and the platelet count as estimated by the reference immunoplatelet CD41/CD61 (flow-based platelet count) (B) and e Between the SysMex XN-2000 Hematology Self-Analyser (SYSMEX X) and platelet count as estimated by the reference method of immunoplatelets CD41/CD61 (C). However, the performance of the XN-2000's whole PLT-F mA© still needs to be evaluated, including samples with a wide range of platelet counts. The main advantage of the XN-2000's PLT-F m'all-optical mA© all-PLT-O instrument is the ability to identify<sup>3</sup> while squid and not count them as platelets [2]. J Clin Pathol. 1d). 1a). There are three variants available: XN-350 offers. (Sysmex XS-Series Instructions jes for User Manual) . We performed a correlation analysis and a comparison of platelet counts measured by The XN-2000 and XE-2100 autoanalyzers with those calculated by the immunoplatelet reference method (IRM) of flow cytometry.In total, 195 peripheral blood samples, which had undergone complete blood count (CBC) at the authoring institution between July and September 2013, were randomly selected for this study. sysmex hematology analyzer Dimensions / weights W x H x D [mm / kg] XN-350: 450 x 510 x 460 / approx. The Sysmex XN-2000 PLT-F method can be more helpful than the XE-2100 PLT-O method in making appropriate clinical decisions regarding platelet transfusion in thrombocytopenic patients. The Sysmex Company (Sysmex, Kobe, Japan) provided all the reagents and equipments for this study.No potential conflicts of interest relevant to this article were reported.1. School M, School M, Oomes J, van Pelt J. Thanks! 18 Dec 2017 The operator may calibrate the following parameters: WBC, RBC, HGB, HCT and PLT. Dear EditorThe recently launched hematology autoanalyzer Sysmex XN-2000 (Sysmex, Kobe, Japan) provides a new method (PLT-F method) for platelet counting based on a fluorescent RNA staining dye named oxazine [1, 2]. Day of Week. Highlights: ¢AÁ€Á XN-350: Single sample analysis in open mode. Mon. 1B). Please help us to share our service with your friends. piezx BA-88A Service Manual(V4.0). These results support the conclusion of a previous study which reported that the XN-2000 PLT-F method could be more useful than the XN-2000 PLT-O method for accurate platelet counting in thrombocytopenic samples (N=37, platelet counts
